Lottery Application

As discussed on 20-08-2024, we are proposing an advanced Lottery application service that will operate a lottery service. This project will include the following panels:

- **User Android Application**
- **Static Website**
- **User IOS Application**
- **Admin Panel**

User Android & IOS Application

1. User Registration and Login:

- **Sign Up:** New users can sign up using their phone number, email, Aadhaar number, front Aadhaar photo, and back Aadhaar photo. All provided details must be unique, or an error message will be displayed.
- **Login:** Existing users can log in using their registered mobile number with OTP verification.

2. Home:

- **Options:** Six types of options and one gift option will be provide.
- **Options Flow:**Select an option, choose a bet amount, and select a payment platform. Pay the amount, and review the payment status with a unique transaction number and lottery series number. The lottery series number is generated after checking the availability of the series.

Example:-

1st Person places a 1 rupee bet, starting with the series A10001. If the same person places another 1 rupee bet, it starts with the series A200001.

2nd Person places a 1 rupee bet, starting with series A10002. After a long time if the first person places another 1 rupee bet, the system should check the availability of the series and then generate the series number A90011

A10001

A1-Represents the series number.

0001-Represents the serial number within that particular series.

The same flow applies to all options and bet amounts.

Gift Options:

1. Enter the mobile number in the input box to check if the user is registered in our application.
2. If the user details are retrieved successfully, process them in the same way as the options.

Adds Space: Spaces will be provide to display ad contents.

Transactions: Recent 10 transactions will be displayed here.

3. Profile:

- **Edit Profile:** Display the name, email, Aadhaar number, and mobile number. The mobile number will be update each time with an availability check.

Holdings: Two options will provide: 1. Self and 2. Gift

1.Self :- It shows only the active participation list and removes the entries after the winner is declared.

2.Gift :- Two options are provided: 1. Self and 2. Others

A. **Self :-** Gifts sent by others are displayed in this list. It shows only the active participation list and removes the entries after the winner is declared.

B. **Other:-**Gifts sent by me to others are displayed in this list. It shows only the active participation list and removes the entries after the winner is declared.

Transactions: It will display only the list of participating winners.

Language: A language selection option is provided. It changes only the 'J' letter in the logo to match the selected language.

Privacy Policy:

Terms & Conditions:

Log Out: This option removes the login session and navigates to the login screen.

15-page profile website can be divided into the following categories:-

- Home
- About
- Services
- Portfolio
- Testimonials
- Blog
- FAQ
- Contact
- Privacy Policy
- Terms and Conditions
- Testimonials

Admin Panel

1. Dashboard:

- **Overview:** Key metrics and KPIs, including active users, winners list, revenue, winner count, number of series generated count in each option, number of winners count in each option, and more.

2. Transactions Management:

- **Transactions Management:**All transactions are listed with options for filtering by date and time.
- **Winner list:** Only the winner list is displayed here, with options for filtering by date and time.

3. User Management:

- **User List:** All registered users are listed here. The admin can supervise all user details, including the uploaded Aadhaar images.
